PROJECTS

Placeholders generated from rules

THE MOMENT

A new project starts. Each engineer creates and names their files their own way. At the end, three deliverables turn out to be missing.

Every expected deliverable created in one go from placeholder sets: tagged, named, secured and in the review steps of its project.

THE FLOW

1. **Take over the project** — Automatic
2. **Choose the review steps** — Project manager
3. **Pick the placeholder sets** — Project manager
4. **Generate** — Automatic
5. **Fill the placeholder** — Engineer
6. **Into review** — Automatic
